Re: RAP Project

The South Vancouver Island Classics Soccer Association [SVICSA] is delighted to hear of Vic West Soccer's plans to lead a project to improve the soccer facility at Royal Athletic Park [RAP].

RAP has historically been a venue to highlight the best in soccer in Victoria, ranging from the matches of local leagues thru to international matches in the run-up to World Cup 1986. Its downtown location makes it ideal for people from all over the region to arrive on foot, or by bike, bus or car – making for a great atmosphere, and spill-over business to downtown.

RAP's existing facility has most of the ingredients needed for success, and with the changes contemplated, could become a major facility in the region.

SVICSA will endeavour to provide a representative to the project team, to collect input from its more than 600 members, and to help in other ways as the project is further developed. At this time, our contact will be Peter Denby, chair of the SVICSA Development Committee.

Hu Wallis – Vice President
South Vancouver Island Classics Soccer Association
